Psychology Studies Program, Department of Social Science and Humanities, Faculty of Social Sciences and Humanities, University Trunojoyo Madura.*2019. xvii + 69 pages + 22 appendix

This study aims to look at the influence of social support to employability. hypothesis proposed in this study is no influence of social support employability. The subjects used in this study was 310 final year students with simple random sampling technique. Collecting data using two scales, namely social support scale consists of 48 items that measure four aspects of social support and employability scale consisting of 40 items that measure three dimensions of employability. Methods of data analysis in this study using statistical parametric Simple regression test with the help of IBM program SPSS 23.0 for Windows. In this study showed the value of F 268.562 with significant value 0,000 then accepted hypothesis in this study. Then the contribution or the effective contribution of social support employability is the regression coefficient R value of 0.682 and is therefore the closeness of the correlation between social support employability is high, and the contribution of social support to employability has a value of Adjusted R Squared $0.466 = 45.6\%$, this significant contribution to the influence of social support employability by 45.6%. This happens because the four aspects of social support that emotional support, instrumental support, support information, and the support of friends is very influential on the high employability in their final year. and the contribution of social support to employability has a value of Adjusted R Squared $0.466 = 45.6\%$, this means that the contribution of social support to employability by 45.6%. This happens because the four aspects of social support that emotional support, instrumental support, support information, and the support of friends is very influential on the high employability in their final year. and the contribution of social support to employability has a value of Adjusted R Squared $0.466 = 45.6\%$, this means that the contribution of social support to employability by 45.6%. This happens because the four aspects of social support that emotional support, instrumental support, support information, and the support of friends is very influential on the high employability in their final year.

ABSTRAK

Puput Nur Hidayatul Ummah. 150541100022. Pengaruh Dukungan Sosial terhadap *Employability* pada Mahasiswa Tingkat Akhir di PTN. X. Program Studi Psikologi, Jurusan Ilmu Sosial dan Ilmu dan Ilmu Budaya, Fakultas Ilmu Sosial dan Ilmu Budaya, Universitas Trunojoyo Madura.2019. xvii + 69 halaman + 22 lampiran

Penelitian ini bertujuan untuk melihat pengaruh dukungan sosial terhadap *employability*. hipotesis yang diajukan dalam penelitian ini adalah ada pengaruh dukungan sosial terhadap *employability*. Subjek yang digunakan dalam penelitian ini adalah 310 mahasiswa tingkat akhir dengan teknik *simple random sampling*. Pengumpulan data menggunakan dua skala, yaitu skala dukungan sosial terdiri dari 48 item yang mengukur empat aspek dukungan sosial dan skala *employability* yang terdiri dari 40 item yang mengukur tiga dimensi *employability*. Metode analisis data yang dilakukan dalam penelitian ini menggunakan statistik parametrik dengan Uji Regresi Sederhana dengan bantuan program *IBM SPSS 23.0 for windows*. Pada penelitian ini diperoleh hasil nilai F 268,562 dengan nilai signifikansi 0,000 maka hipotesis pada penelitian ini diterima. Kemudian kontribusi atau sumbangan efektif dukungan sosial terhadap *employability* adalah nilai koefisien regresi R sebesar 0,682 dengan demikian korelasi keeratan antara dukungan sosial dengan *employability* termasuk tinggi, dan kontribusi antara dukungan sosial terhadap *employability* mempunyai nilai Adjusted R Squared sebesar 0,466=45,6%, hal ini berarti sumbangsih pengaruh dukungan sosial terhadap *employability* sebesar 45,6%. Hal tersebut terjadi karena empat aspek dukungan sosial yaitu dukungan emosional, dukungan instrumental, dukungan informatif dan dukungan pertemanan sangat berpengaruh terhadap tingginya *employability* pada mahasiswa tingkat akhir.

Kata Kunci : Dukungan Sosial, *Employability*, Mahasiswa Tingkat Akhir
