

Elvy Risky Annisak.2025. *Pengembangan Media Pembelajaran Pencarian Harta Karun Pada Pembelajaran IPAS Materi Sistem Pernafasan Manusia Pada Siswa Kelas V Di SDN Bulay 2 Pamekasan*. Skripsi, Program Studi Pendidikan Guru Sekolah Dasar, Fakultas Keguruan dan Ilmu Pendidikan, Universitas Trunojoyo Madura. Pembimbing: Bagus Rahmad Wijaya, S.Pd., M.Pd

ABSTRAK

Penelitian ini mengembangkan media berupa media pembelajaran pencarian harta karun untuk peserta didik kelas V di SDN Bulay 2 Pamekasan. Tujuan penelitian ini adalah untuk mengetahui kevalidan, keefektifan, dan kepraktisan media tersebut. Penelitian ini menggunakan model ADDIE (*Analyze, Design, Develop, Implement, Evaluate*). Teknik pengumpulan data meliputi observasi, wawancara, angket, dan tes. Hasil validasi menunjukkan nilai 95% dari ahli materi, 82,5% dari ahli media pembelajaran, dan 90% dari ahli desain pembelajaran. Keefektifan media dinilai berdasarkan angket respon guru dan peserta didik, serta hasil belajar peserta didik yang dilakukan pada uji coba kelompok kecil dan besar. Pada uji coba kelompok kecil, angket respon guru memperoleh skor 95% dan angket respon peserta didik 90%, serta hasil belajar klasikal 100% (kategori tuntas). Pada uji coba kelompok besar, angket respon guru memperoleh skor 97,5% dan angket respon peserta didik 89,5%, serta hasil belajar klasikal 100% (kategori tuntas). Kepraktisan media pembelajaran dinilai berdasarkan lembar observasi aktivitas guru dan peserta didik, dengan hasil 93,3% pada uji coba kelompok kecil dan 96,6% pada uji coba kelompok besar untuk lembar observasi aktivitas guru, serta 94,4% pada uji coba kelompok kecil dan 94,2% pada uji coba kelompok besar untuk lembar observasi aktivitas peserta didik. Berdasarkan hasil penelitian yang diperoleh menunjukkan media pembelajaran pencarian harta karun valid, efektif, dan praktis untuk digunakan di dalam pembelajaran.

Kata Kunci: Media, Pembelajaran, Pencarian Harta Karun.

ABSTRACT

This research develops media in the form of treasure hunting learning media for class V students at SDN Bulay 2 Pamekasan. The aim of this research is to determine the validity, effectiveness and practicality of this media. This research uses the ADDIE (Analyze, Design, Develop, Implement, Evaluate) model. Data collection techniques include observation, interviews, questionnaires and tests. The validation results show a score of 95% from material experts, 82.5% from learning media experts, and 90% from learning design experts. The effectiveness of the media is assessed based on teacher and student response questionnaires, as well as student learning outcomes carried out in small and large group trials. In small group trials, the teacher response questionnaire obtained a score of 95% and the student response questionnaire 90%, and classical learning results were 100% (complete category). In large group trials, the teacher response questionnaire obtained a score of 97.5% and the student response questionnaire 89.5%, as well as classical learning results of 100% (complete category). The practicality of learning media was assessed based on teacher and student activity observation sheets, with results of 93.3% in small group trials and 96.6% in large group trials for teacher activity observation sheets, and 94.4% in small group trials and 94.2% in large group trials for student activity observation sheets. Based on the research results obtained, it shows that the learning media for treasure hunting is valid, effective and practical for use in learning.

Keywords: Media, Learning, Treasure Search.
