ABSTRAK

Penelitian ini merupakan penelitian kuantitatif dengan menggunakan desain *Quasi Eksperimental Design*, penelitian ini dilaksanakan di kelas V UPTD SDN Noreh VIII yang berjumlah 40 siswa. Sampel diambil dengan menggunakan Teknik Sampling Total, yang mana seluruh anggota populasi di jadikan objek penelitian. Sampel yang diambil sebanyak 2 kelas. Penelitian ini bertujuan untuk mengetahui pengaruh Metode *Index Card Match* terhadap hasil belajar siswa. Hasil penelitian menunjukkan bahwa ada Metode *Index Card Match* memberi pengaruh terhadap hasil belajar siswa berdasarkan hasil perhitungan uji signifikan (uji-t), maka diperoleh nilai t_{hitung} sebesar 4,312 dan $t_{tabel\ t(\alpha/2, n1+n2-2)} = 2,024$. Dengan nilai t_{hitung} dan t_{tabel} diperoleh $t_{hitung} > t_{tabel}$, ini berarti H_0 ditolak dan H_a diterima. Sehingga pembelajaran dengan menggunakan Metode *Index Card Match* memberikan pengaruh yang signifikan terhadap hasil belajar siswa kelas V UPTD SDN Noreh VIII.

Rohimatus Syarifah. 2019. Effect of Index Card Match Method on Student Learning Outcomes Natural Science Subjects Material of Class V Odd Semester UPTD SDN Noreh VIII. Thesis, Primary School Teacher Education Study Program, Faculty of Education, University of Trunojoyo Madura. Advisor I: Mujtahidin, S.Pd., M.Pd, Advisor II: Fachrur Rozie, S.Pd., M.Pd.

ABSTRACT

This research is a quantitative study using the Quasi Experimental Design design, this study was conducted in class V of UPTD SDN Noreh VIII, amounting to 40 students. Samples are taken using the Total Sampling Technique, where all members of the population are subjected to research. Samples taken were 2 classes. This study aims to determine the effect of the Index Card Match Method on student learning outcomes. The results of the study show that there is an Index Card Match method that influences student learning outcomes based on the results of the calculation of significant tests (t-test), then t_{count} obtained is 4.312 and $t_{table} t(\alpha / 2, n_1 + n_2 - 2) = 2.024$. With the value of t_{count} and t_{table} obtained $t_{count} > t_{table}$, this means H_0 is rejected and H_a is accepted. So that learning by using the Index Card Match Method gives a significant influence on the learning outcomes of fifth grade students of the UPTD Noreh VIII SDN.
