

ABSTRACT

Wahyu Qadarillah, *"Shifting Meaning of Land Inheritance Due to Land Acquisition Program For Rural Community District West Sukolilo Labang Bangkalan"*. Undergraduate Thesis, Department of Sociology, Faculty of Social Sciences and Cultural Studies, University Trunojoyo Madura.

Keywords: *Heritage Land Conflict*

Construction of a bridge linking Surabaya with Madura Island (Suramadu) will automatically bring forth positive and negative impacts to the community and society at large Madura Sukolilo Village West in particular. Construction of this mega project would require a land acquisition program, and the next, industrialization will be traveling after Suramadu stood firm. The process of land acquisition which is the first stage of development and industrialization bridge afterwards.

The land acquisition program seems to be the first trip the process of social change in the village of West Sukolilo visible. Be interesting if it turns out that the land acquisition impact on land prices so quickly make the public view on the ground is changing. Soil that has a strong cultural value to the community Madura will eventually eroded by economic value. While the economic value of these cultural values that lead to soil degradation to society Sukolilo Village West.

This study uses qualitative research, namely by trying to describe and explain the process as well as the impact of the shifting meaning of the land for the village of West Sukolilo.

This study describes in detail and try to explain how the process of shifting ground of meaning that occurs in the midst of society. The meaning and value of cultural heritage lands which initially has a position and the position of very valuable to society now is like just a mere economic commodities. Inherited land which was originally meant trust, confidence, and present a unifying kinship only thing that should be contested, so they are a cause of discord, conflict / dispute, the rise of consumer culture, and the estate no longer be a valuable thing in the cultural sphere.
