ABSTRACT

This study aims to develop a decent, effective, practical, and interesting book of local wisdom based on Madura fishing communities that can facilitate teachers and students in Civics learning in Grade III of Pangeranan V Elementary School. The study used the R & D (Research and Development) method, the development model of Borg and Gall adapted by Sugiyono. The results showed that: (1) the results of the feasibility trial of teaching materials from the expert validator of the learning material were 87%, 86% local experts in material expertise, 95% linguists, 85% design experts with very feasible categories. (2) The results of the attractiveness test are based on students' responses to the product trial of 90%, 92% trial use with very interesting categories. (3) The results of the effectiveness test on product trials, the results of observation of teacher activities amounted to 96% and the results of observations of student activities amounted to 88.6%. In the trial use, the results of the observation of teacher activities amounted to 100%, the results of observations of student activities amounted to 90% with a very effective category. (4) Practical test results based on teacher responses of 88% with very practical categories. The conclusions of the study are the local wisdom books based on Madura fishing communities that are very suitable to be used in PKn learning material "has pride as an Indonesian nation" in class III SDN Pangeranan V Bangkalan.

Keywords: *Civics, illustrated story books, local wisdom of Madurese fishing communities*
