

## **ABSTRACT**

Mulyadi, Analysis income of Fishermen Laborers In Sumenep. Supervisor (I) Jafar Sadik S.E., M.E (II) Henny Oktavianti S.E., M.E.

This study aimed to analyze the factors influencing the fishermen laborers income in Sumenep with variable revenue as the dependent variable, while the independent variable were variable of working hours, variable of working experiences, and variable of facilities and infrastructures. The used data was primary data and secondary, primary data was obtained by distributing questionnaires to hundred respondents working as fishermen laborers in the area of mainland coast in Sumenep. The used analytical method was a multiple linear regression analysis.

The research results show that the variable working hours and variable of working experiences had some positive effects on the fishermen laborers income in Sumenep. The variable of facilities and infrastructures did not affect the fishermen laborers income in Sumenep. Meanwhile, in the same time, these variables had effect on the fishermen laborers income in Sumenep. The variation proportion of the working hours variable (X1) working experiences (X2), and facilities and infrastructures (X3) in explaining the dependent variable of the fishermen laborers income in Sumenep (Y) were around 42% whereas 58% were explained by other factors.

Keywords: fishermen laborers income, working hours, working experiences, and facilities and infrastructures.

### **ABSTRAK**

Mulyadi, Analisis Pendapatan Nelayan Buruh Di Kabupaten Sumenep. Pembimbing (I) Jakfar Sadik S.E., M.E (II) Henny Oktavianti S.E., M.E.

Penelitian ini bertujuan untuk menganalisis faktor yang mempengaruhi pendapatan nelayan buruh di Kabupaten Sumenep dengan variabel pendapatan sebagai variabel dependen, sedangkan variabel independennya adalah variabel jam kerja, dan variabel pengalaman kerja, dan variabel sarana dan prasarana. Data yang digunakan adalah data primer dan sekunder, data primer didapat melalui penyebaran kuesioner kepada seratus responden yang bekerja sebagai nelayan buruh di wilayah pesisir daratan di Kabupaten Sumenep. Metode analisis yang digunakan adalah Analisis regresi linier berganda.

Berdasarkan hasil penelitian menunjukkan bahwa variabel jam kerja dan variabel pengalaman kerja berpengaruh positif terhadap pendapatan nelayan buruh di Kabupaten Sumenep. Variabel sarana dan prasarana tidak berpengaruh terhadap pendapatan nelayan buruh di Kabupaten Sumenep. Sementara itu, secara bersama-sama variabel tersebut memiliki pengaruh terhadap pendapatan nelayan buruh di Kabupaten Sumenep. Proporsi variasi variabel jam kerja (X1) pengalaman kerja (X2), dan sarana dan prasarana (X3) dalam menjelaskan variabel terikat pendapatan nelayan buruh di Kabupaten Sumenep (Y) sebesar 42% sedangkan sisanya 58% diterangkan oleh faktor yang lain.

Kata Kunci : Pendapatan nelayan buruh, jam kerja, pengalaman kerja, dan sarana dan prasarana.
