

ABSTRAK

Wiwid Megananda. 120521100012. Sociology Program. Lesbian Sexual Behavior in Surabaya (Case Study at the Royal Plaza Surabaya)

This thesis entitled "Sexual Behavior Lesbians In Surabaya (Case Study at the Royal Plaza Surabaya). This research studies about sexual behavior conducted by gay or lesbian types of women in the city of Surabaya. The issues raised in this study is: what is the background of a person into a dyke. Then any other forms of sexual behavior of gay or lesbian female type.

This study aims to: find out what the background of a person into a dyke. Then to be able to know what sexual behavior gay or lesbian kinds of women in sexual intercourse with the same sex they are women. The location of this research is in the city of Surabaya who have lesbian community who usually gather in Surabaya, royal plaza mall, but here researchers instead examined the community but rather to the personal. Determination of informants in this study were determined by means of snowball sampling and tailored to the needs of the date. Informants in this study consists of 4 people.

The research method that I use is descriptive qualitative research methods, data collection techniques is done through in-depth interviews and participant observation. This study shows that there are some things that cause people to dyke the personal experiences of the past, resulting in trauma to the opposite sex, environmental factors both internal, namely the family, as well as external factors, namely promiscuity among friends that cause a person to be a lesbian.

The characteristic feature of Buchi (a term for a lesbian males) are more boyish look or behave like men -Eighteen and for femme (call for lesbian women) look more like a normal woman, but their viewpoint on a more attracted to women.
