ABSTRACT

This research is motivated by the limited learning media and student learning outcomes that are below the average KKM. The purpose of this study was to find out the validity in terms of the results of the expert validation questionnaire, secondly the effectiveness can be seen from the teacher and student observation sheets and the third the attractiveness of this carpel media is seen from the student response questionnaire. This development research uses Sugiyono's model. The validity of the media was obtained from 84% validators (valid). Media attractiveness is obtained from a student response questionnaire of 78% (interesting). The effectiveness of the media was obtained from the teacher activity observation sheet of 90% (very effective), the student activity observation sheet of 95% (very effective), and the percentage of classical completeness of 100% in the complete category. Judging from the results that have been obtained, it can be said that many aspects of learning have been achieved and completed. The conclusion is that the material carpel media for these types of work can be said to be valid, effective and very interesting for use in grade 4 at SDN Kraton 2 Bangkalan.
