ABSTRACT

The purpose of this study was to determine the effect of democratic parenting style on the expressive language of children aged 4-5 years in Tarbiyatul Muhtadiin Kindergarten. The population of this study were all 25 students of TK A Tarbiyatul Muhtadiin and the parents of 25 students. The results of the study show that there is a significant influence between the effect of democratic parenting on children's expressive language. This is proven through the output that is processed using SPSS version 25.

Based on the results of the coefficient of determination test in table 2, an adjusted R-Square value of 0.968 (96.8%) is obtained. This value means that the effect of democratic parenting in this study affects children's expressive language skills by 96.8%. While the remaining 3.2% is explained by variables other than the independent variables in the study.

Keywords: democratic parenting style, children's expressive language
