

Abstract

Robby Kiblat Alimy. NIM 110521100059. Sociology Study Program. Faculty of Social and Cultural Science. University of Trunojoyo Madura. This Research Entitled **The Sexuality of Gay College Students Habits (The Study Case of College Student in the University in Bangkalan District)** that advised by Iskandar Dzulkarnain, S. Thi. M. Si.

This research was descriptive qualitative analysis by using study case method. The Informant of this study was the students who have a sexual disorder, particularly in gay, by using snowball sampling method. The method of collecting data in this study was based two groups of data. They were secondary data and primary data. The secondary data were obtained by using books, article, and result of the previous study that related to research problem of this study. The primary data were obtained by observation and depth interview with the subject of this study. The method of data analysis used data reduction, and the theory of this research was the theory of sexual habits.

The result shows, first: the college students that have indication to be or choose to be gay do sexuality habits with their friend that has same sexuality habits, is a part of the gay group of Bangkalan region. Second, they have relationship between gay and almost do activity together like straight relationship.
