This paper analyzes how the self changing in the novel Aimee Cabo Nikolov. This study aims to describe the Aimee's process as the main character in the novel. It is process changes in self-based psychosocial. This explains how each stage in Aimee's life developed. This explains how the relation between personality and psychosocial development. The analysis of study use the Psychosocial Development theory. Data collected by reading novels, data in the form of utterances of characters and authors. The results showed that at every age there was a change in self, Aimee who had been influenced by the environment when she was treated like an adult and given violence made her develop not according to the stages of humans in general. It makes her work hard to solve problems in her life journey.
