

ABSTRACT

Law enforcement is the application of discretion that makes decisions not strictly regulated by the rule of law, but it has an element of personal evaluation, the essence of law enforcement lies in activities which harmonizing the relationships of values in the solid rules and attitudes of criminal acts as the final values, environmental pollution according to paragraph 1 number 14 ordinance number 32 Year 2009 concerning the protection of environmental management is the enter or entry of living things, substances, energy, and or other components into the environment by human activities so it exceeds the environmental quality standards that has been set.

The type of research which used is a sociological empirical study using the interview method. The research took location in Pandan pancur village, Deket Sub-district, Lamongan District. Data collection techniques are using observation and interviews. The data which obtained changed to percentage the aims is to make it easier to analyze

The results showed that the public said they were disturbed because of the stench. The public continued to carry out activities as usual without using a mask and also did not make any effort to eliminate the stench. The demonstration conducted by the community was a part of an adaptation effort so that the stench disappears.

Keywords: Law Enforcement
