

ABSTRACT

Ramadhani, Risqiyati. 190511100024. English Study Program. *An Adjacency Pairs Analysis in Thor Love and Thunder Movie.*

This research is aim to find the patterns of adjacency pairs and the preference responses that occur in *Thor Love and Thunder* movie. The researcher used qualitative research design because the data found by the researcher is in the form of transcription and also the data are based on the human behavior in conversation of *Thor Love and Thunder* movie. The theory used in this research are from Liddicoat (2007) and Paltridge (2012). The data results of this research are found 26 patterns, such as compliment – acceptance, question – expected answer, assessment – agreement, leave – taking, telling – acceptance, request – acceptance, greeting – greeting, command – acceptance, offer – acceptance, apology – acceptance, complaint – acceptance, suggestion – acceptance, summon – answer, question – unexpected answer, assessment – disagreement, telling – denial, request – refusal, command – refusal, suggestion – refusal, invitation – refusal, telling (question-answer) acceptance, telling (question-answer) denial, question (question-answer) answer, command (question-answer) acceptance, assessment (question-answer) agreement. The researcher found several patterns that shown patterns those are a development of the theory. One of the several patterns of the data results that shown adjacency pairs increase a new vary is compliment – acceptance. Based on the results, this research shows that the patterns of adjacency develop according to the environment in which the adjacency pairs appear, as long as the FPP and SPP are relevant.

Key words: Adjacency pairs, Pattern, Preference, Thor Love and Thunder

ABSTRAK

Ramadhani, Risqiyati. 190511100024. Program Studi Sastra Inggris. *An Adjacency Pairs Analysis in Thor Love and Thunder Movie.*

Tujuan dari penelitian ini adalah untuk menemukan pola-pola adjacency pairs dan preference respon yang muncul dari movie *Thor Love and Thunder*. Peneliti menggunakan rancangan penelitian kualitatif dalam penelitian ini karena data yang ditemukan berupa transkripsi dan juga data didasarkan pada perilaku manusia dalam percakapan di movie *Thor Love and Thunder*. Teori yang digunakan dalam penelitian ini berasal dari Liddicoat (2007) dan Paltridge (2012). Data hasil penelitian ini ditemukan 26 pola, seperti, compliment – acceptance, question – expected answer, assessment – agreement, leave – taking, telling – acceptance, request – acceptance, greeting – greeting, command – acceptance, offer – acceptance, apology – acceptance, complaint – acceptance, suggestion – acceptance, summon – answer, question – unexpected answer, assessment – disagreement, telling – denial, request – refusal, command – refusal, suggestion – refusal, invitation – refusal, telling (question-answer) acceptance, telling (question-answer) denial, question (question-answer) answer, command (question-answer) acceptance, assessment (question-answer) agreement. Peneliti menemukan beberapa pola yang menunjukkan suatu pola yang merupakan perkembangan dari teori yang dikemukakan. Salah satu dari beberapa pola hasil data yang menunjukkan variasi baru dari adjacency pairs adalah compliment – acceptance. Berdasarkan hasil penelitian, penelitian ini menunjukkan bahwa pola adjacency pairs akan berkembang sesuai dengan lingkungan di mana adjacency pairs itu muncul, selama FPP dan SPP relevan.

Kata kunci: Pola, Adjacency pairs, Preference, Thor Love dan Thunder.
