

Kiki Dian Aprilia. 2023. *Pengembangan Aplikasi Android “ANSA” (Anak Saleh) Menstimulasi Hafalan Doa Harian Anak*. Skripsi, Program Studi Pendidikan Guru Pendidikan Anak Usia Dini, Fakultas Ilmu Pendidikan, Universitas Trunojoyo Madura. Pembimbing: Muhammad Busyro Karim.

ABSTRAK

Penelitian ini bertujuan untuk mengetahui proses dan kelayakan pengembangan aplikasi android ANSA (Anak Saleh) dalam menstimulasi hafalan doa harian siswa kelas A RA Al-Qosimy di desa Watugaluh, Kecamatan Diwek, Kabupaten Jombang. Media pembelajaran ANSA (Anak Saleh) merupakan media berbasis aplikasi android yang dibuat dengan mengkombinasikan macam-macam obyek multimedia yaitu teks, gambar, animasi, audio dan tombol interaktif. Penelitian ini menggunakan metode *Research and Development (R&D)* dengan model ADDIE (*Analysis, Design, Development, Implementation and Evaluation*). Tahap penelitian meliputi (1) analisis masalah dan kebutuhan, (2) perancangan media, (3) pengembangan media, (4) penerapan media (5) evaluasi berdasarkan validasi ahli materi, validasi ahli media, uji coba lapangan, uji coba kelompok kecil dan uji coba lapangan. Subjek penelitian sebanyak 32 siswa. Data dikumpulkan dengan menggunakan observasi, dokumentasi, wawancara dan kuesioner. Hasil penelitian menunjukkan bahwa aplikasi android ANSA (Anak Saleh) memperoleh penilaian dari ahli materi dengan rata-rata persentase 89%. Penilaian dari ahli materi dengan rata-rata persentase 77%. Penilaian uji coba perorangan dengan rata-rata persentase 87%. Penilaian uji coba kelompok kecil dengan rata-rata persentase 87%. Penilaian uji coba lapangan dengan rata-rata persentase 90%. Kesimpulan: media aplikasi ANSA (Anak Saleh) dalam menstimulasi hafalan doa harian dinyatakan valid dan layak digunakan sebagai media pembelajaran.

Kata kunci: Anak Usia Dini, Aplikasi Android, Hafalan Doa Harian.

ABSTRAC

This study aims to determine the process and feasibility of developing the ANSA (Anak Saleh) android application in stimulating the memorization of the daily prayers of class A RA Al-Qosimy students in Watugaluh village, Diwek District, Jombang Regency. Learning media ANSA (Anak Saleh) is an android application-based media created by combining various multimedia objects, namely text, images, animation, audio and interactive buttons. This research uses the Research and Development (R&D) method with the ADDIE model (Analysis, Design, Development, Implementation and Evaluation). The research phase includes (1) problem and needs analysis, (2) media design, (3) media development, (4) media application (5) evaluation based on material expert validation, media expert validation, field trials, small group trials and field trials. The research subjects were 32 students. Data was collected using observation, documentation, interviews and questionnaires. The results showed that the ANSA (Anak Saleh) android application obtained an assessment from material experts with an average percentage of 89%. Assessment of material experts with an average percentage of 77%. Assessment of individual trials with an average percentage of 87%. Assessment of small group trials with an average percentage of 87%. Assessment of field trials with an average percentage of 90%. Conclusion: the ANSA (Anak Saleh) application media in stimulating the memorization of daily prayers is stated to be valid and suitable for use as a learning media.
