

Elva Elhana. NIM. 220321100071. Peran dan Kontribusi Pendapatan Perempuan Pesisir Dalam Usaha Perikanan Desa Junganyar, Kecamatan Socah, Bangkalan. Dibawah Bimbingan. Dr. Mokh Rum, S.P., M.P.

ABSTRAK

Perempuan pesisir memiliki peran penting dalam mendukung keberlangsungan ekonomi keluarga nelayan, khususnya melalui keterlibatan dalam berbagai kegiatan usaha perikanan. Penelitian ini bertujuan untuk mengetahui peran perempuan pesisir ditinjau dari aspek sosial, ekonomi, dan ekologi, serta menganalisis besarnya kontribusi pendapatan perempuan terhadap pendapatan keluarga di Desa Junganyar, Kecamatan Socah, Kabupaten Bangkalan. Penelitian ini menggunakan pendekatan kuantitatif dengan metode deskriptif. Penentuan responden dilakukan menggunakan teknik *snowball sampling*. Data dikumpulkan melalui wawancara, observasi, dan kuesioner. Analisis pengukuran peran perempuan dilakukan menggunakan skala Likert, sedangkan kontribusi pendapatan dianalisis dengan menghitung persentase pendapatan perempuan terhadap total pendapatan keluarga. Hasil penelitian menunjukkan bahwa perempuan pesisir di Desa Junganyar menjalankan peran ganda, yaitu peran sosial, ekonomi, dan ekologi. Peran sosial perempuan tergolong aktif melalui keikutsertaan dalam kegiatan kemasyarakatan seperti PKK, pengajian, arisan, dan gotong royong. Peran ekonomi perempuan terlihat dari keterlibatan dalam perdagangan ikan segar, pengolahan hasil perikanan, dan menjadi buruh pengolahan, yang berkontribusi nyata terhadap pendapatan keluarga. Sementara itu, peran ekologi masih tergolong rendah, terutama dalam kegiatan pengurangan limbah dan upaya menjaga kebersihan lingkungan pesisir. Kontribusi pendapatan perempuan terhadap pendapatan keluarga menunjukkan bahwa pendapatan perempuan memberikan sumbangan yang cukup signifikan dalam membantu memenuhi kebutuhan Keluarga.

Kata kunci: Peran perempuan pesisir, pendapatan, usaha perikanan

Elva Elhana. NIM. 220321100071. *The Role and Contribution of Women's Income in the Fishing Industry in Junganyar Village, Socah District, Bangkalan*. Supervised By Dr. Mokh Rum, S.P., M.P.

ABSTRACT

Coastal women play an important role in supporting the economic sustainability of fishing families, particularly through their involvement in various fishing activities. This study aims to determine the role of coastal women from social, economic, and ecological perspectives, as well as to analyze the contribution of women's income to family income in Junganyar Village, Socah District, Bangkalan Regency. This study uses a quantitative approach with a descriptive method. Respondents were determined using snowball sampling. Data were collected through interviews, observations, and questionnaires. The analysis of women's roles was conducted using a Likert scale, while income contribution was analyzed by calculating the percentage of women's income to total family income. The results showed that coastal women in Junganyar Village played dual roles, namely social, economic, and ecological roles. Women's social roles were classified as active through their participation in community activities such as PKK, religious recitation, social gatherings, and mutual assistance. The economic role of women is evident in their involvement in the fresh fish trade, fish processing, and as processing workers, which contributes significantly to family income. Meanwhile, their ecological role is still relatively low, especially in waste reduction activities and efforts to maintain coastal environmental cleanliness. Women's contribution to family income shows that it is quite significant in helping to meet the needs of family.

Keywords: Role of coastal women, income, fishery businesses
