ABSTRAK

Tujuan Penelitian pengembangan ini untuk; (1) mengetahui kevalidan produk hasil pengembangan media pembelajaran ULKARLOKA (Ular Tangga Kartu Kearifan Lokal), (2) mengetahui keefektifan produk hasil pengembangan media pembelajaran, (3) mengetahui kemenarikan produk hasil pengembangan media pembelajaran. Penelitian ini merupakan penelitian RnD (Research and Development). Model yang digunakan dalam penelitian ini adalah model ADDIE dengan uji coba kelompok kecil 4 siswa dan uji coba kelompok besar 12 siswa. Berdasarkan hasil penelitian yang telah dilakukan, didapatkan persentase kevalidan media pembelajaran diperoleh dari validator ahli media pembelajaran 94,6% dengan kategori “sangat valid”, ahli materi 72% kategori “valid”, dan ahli desain pembelajaran 85,3% kategori “sangat valid”. Persentase keefektifan dari media pembelajaran diperoleh dari observasi aktivitas guru dan siswa, hasil belajar siswa (kognitif). Hasil observasi aktivitas guru pada uji coba kelompok besar memperoleh 96,6% dengan kategori “sangat efektif”, aktivitas siswa pada uji coba kelompok besar memperoleh 95,7% dengan kategori “sangat efektif”, serta tes hasil belajar siswa pada uji coba kelompok besar dinyatakan tercapai mendapatkan nilai diatas KKTP 75 dan mendapatkan persentase sebesar 100% dalam kategori “tercapai”. Hasil dari kemenarikan media pembelajaran diperoleh dari angket respon siswa memperoleh 97,1% “sangat menarik”. Berdasarkan hasil hasil penelitian maka media pembelajaran dikatakan valid, aktif dan menarik untuk digunakan dalam kegiatan belajar mengajar di kelas IV SDN Karangmojo 1 Jombang.

ABSTRACT

The objectives of this development research are: (1) to determine the validity of the product resulting from the development of the ULKARLOKA (Snakes and Ladders Local Wisdom Card) learning media, (2) to determine the effectiveness of the product resulting from the development of the learning media, (3) to determine the attractiveness of the product resulting from the development of the learning media. This research is an RnD (Research and Development) study. The model used in this study is the ADDIE model with a small group trial of 4 students and a large group trial of 12 students. Based on the results of the research that has been conducted, the percentage of validity of the learning media obtained from the validator learning media experts was 94.6% in the "very valid" category, 72% in the "valid" category from the material experts, and 85.3% in the "very valid" category from the learning design experts. The percentage of effectiveness of the learning media was obtained from observations of teacher and student activities, and student learning outcomes (cognitive). Observations of teacher activity in the large-group trial showed a score of 96.6%, categorized as "very effective." Student activity in the large-group trial showed a score of 95.7%, categorized as "very effective." The student learning outcome test in the large-group trial showed a score above the minimum competency standard (KKTP) of 75 and a score of 100%, categorized as "achieved." The attractiveness of the learning media, obtained from the student response questionnaire, showed a score of 97.1%, categorized as "very interesting." Based on the research results, the learning media is considered valid, active, and engaging for use in teaching and learning activities in grade IV of SDN Karangmojo 1 Jombang.
