ABSTRACT

This research is a development research (Research and Development) which is motivated by the students' needs for; (1) interactive learning media as a means to help students understand poetry text material, and (2) presentation of material that is student-friendly, easy to access, and supported by media that contains various features such as text, visuals, and interactive navigation so that learning does not take place monotonously. This research aims to; (1) produce a website-based "Rima Edu" learning media for poetry reading skills for class VIII: a konstrapro study, and (2) determine students' responses to the development of interactive "Rima Edu" learning media based on the website for poetry reading skills for class VIII: a konstrapro study. The development model used in this research is ADDIE (Analysis, Design, Development, Implementation, Evaluation). Product implementation was carried out at Al-Hikam Burneh Middle School, Bangkalan with a total of 37 students as trial subjects. The results of the study show; (1) the process of developing the website-based "Rima Edu" learning media for poetry reading skills for class VIII: the konstrapro study obtained an average value of feasibility from material experts of 88%, language experts of 92%, and media experts of 80% with a very feasible category, and (2) student responses to the development of the website-based "Rima Edu" learning media for poetry reading skills for class VIII: the konstrapro study was classified as very good, with an average value of 88.3% with a very feasible category so that the website-based "Rima Edu" learning media can be used in the learning process at school.
