

ABSTRAK

Penelitian ini bertujuan untuk mencari dan menganalisis model pengelolaan yang diharapkan dapat mengatasi penanganan sampah di Kabupaten Bangkalan. Penelitian menggunakan metode yuridis sosiologis dengan pendekatan eksploratif. Objek penelitian adalah model pengelolaan sampah sebagai upaya non-penal dalam pencegahan pencemaran lingkungan. Penelitian dilaksanakan di Pacentan, Kecamatan Tanah Merah, Kabupaten Bangkalan dengan teknik pengumpulan data melalui studi kepustakaan, wawancara dengan Dinas Lingkungan Hidup Kabupaten Bangkalan dan masyarakat, serta observasi lapangan. Hasil penelitian menunjukkan bahwa pengelolaan sampah di Kabupaten Bangkalan masih menghadapi kendala berupa keterbatasan sarana dan prasarana, keterbatasan armada pengangkut, serta rendahnya kesadaran masyarakat. Oleh karena itu, model pengelolaan yang diharapkan dapat mengatasi permasalahan tersebut adalah pendekatan non-penal melalui penerapan prinsip 3R (*Reduce, Reuse, Recycle*), sosialisasi dan edukasi lingkungan, serta peningkatan partisipasi masyarakat dan pemerintah dalam pengelolaan sampah sehingga dapat mengurangi pencemaran lingkungan secara berkelanjutan.

Kata Kunci : *Upaya Non-Penal, Pengelolaan Sampah, Pencemaran Lingkungan, 3R.*

ABSTRACT

This study aims to find and analyze a management model that is expected to overcome waste management in Bangkalan Regency. The research uses a sociological juridical method with an exploratory approach. The object of the research is the waste management model as a non-penal effort in preventing environmental pollution. The research was carried out in Pacentan, Tanah Merah District, Bangkalan Regency with data collection techniques through literature studies, interviews with the Bangkalan Regency Environmental Agency and the community, and field observations. The results of the study show that waste management in Bangkalan Regency still faces obstacles in the form of limited facilities and infrastructure, limited transport fleets, and low public awareness. Therefore, the management model that is expected to overcome these problems is a non-penal approach through the application of the 3R (Reduce, Reuse, Recycle) principle, socialization and environmental education, as well as increasing community and government participation in waste management so as to reduce environmental pollution in a sustainable manner.

Keywords : Non-Penal Efforts, Waste Management, Environmental Pollution, 3R.
