Ata Nisaul Hasanah. 130541100136. Kesetiaan Istri Pada Suami Disabilitas Fisik *Pasca* Kecelakaan. Skripsi, Program Studi Psikologi Fakultas Ilmu Sosial Dan Ilmu Budaya, Universitas Trunojoyo Madura. 2018.

Penelitian ini bertujuan untuk mengetahui kesetiaan istri pada suami disabilitas fisik *pasca* kecelakaan. Metode penelitian menggunakan pendekatan kualitatif fenomenologi. Subjek penelitian ini adalah tiga istri dari suami penyandang disabilitas fisik *pasca* kecelakaan (ST, DW dan TG) yang ditentukan melalui teknik *purposive sampling*. Metode pengambilan data menggunakan wawancara semi terstruktur. Teknik analisis data yang digunakan adalah teknik analisis data dari *Milles and Huberman* dengan triangulasi sumber sebagai uji keabsahan data. Hasil penelitian menunjukkan bahwa kesetiaan istri pada suami penyandang disabilitas fisik dapat dilihat dari aspek-aspek kesetiaan, yaitu ketaatan atau kepatuhan, ketiga subjek yang mempunyai suami disabilitas akan lebih taat dan patuh kepada suami karena merasa iba dengan suami yang mempunyai keterbatasan fisik sehingga enggan untuk membantah. Kedua, bertanggung jawab, ketiga subjek dapat bertanggung jawab atas konsekuensinya bertahan dengan suami disabilitas dengan cara mengambil alih fungsi suami dalam bekerja untuk memenuhi kebutuhan ekonomi keluarga, menjadi tulang punggung keluarga. Ketiga, pengabdian yang menunjukkan ketiga subjek mengabdikan untuk merawat suami disabilitas, keadaan suami yang tidak bisa hidup mandiri membuat ketiga subjek melayani suami dengan ikhlas serta memberikan cinta kepada suami. Keempat, kejujuran, istri jujur terhadap perasaannya terhadap suami dan semua tentang rumah tangga suami istri.

ABSTRACT

Ata Nisaul Hasanah. 130541100136. Wife's Loyalty to Husband Physical Disability Post Accident. Thesis, Psychology Study Program Faculty of Social and Cultural Sciences, University of Trunojoyo Madura. 2018.

This study aims to determine the loyalty of wives to husbands physical disability after the accident. The research method used qualitative approach of phenomenology. The subjects of this study were three wives of physically disabled persons with post-accident disabilities (ST, DW and TG) determined by purposive sampling technique. Methods of data retrieval using semi-structured interviews. Data analysis technique used is data analysis technique from Milles and Huberman with triangulation of source as test of data validity. The results showed that the loyalty of wives to husbands with physical disabilities can be seen from the aspects of loyalty, namely obedience or compliance, the three subjects who have disability husbands will be more obedient and obedient to the husband because he feels compassionate with husbands who have physical limitations so reluctant to deny . Second, responsible, the three subjects can be responsible for the consequences of surviving with disability husbands by taking over the husband's function in working to meet the economic needs of the family, the backbone of the family. Third, devotion that shows the three subjects serve to care for the husband of disability, the condition of the husband who can not live independently make the three subjects prepare and serve all the needs of the husband with sincerity. Fourth, honesty, the second and third subject tell everything to the husband like a household matter, something the wife does, as well as the feelings of the wife. The first subject is less honest with the feelings of the husband because of the attitude of the husband who is indifferent to the wife.

Keywords: Loyalty, physical disability
