ABSTRAK

Tujuan dari penelitian ini adalah untuk mengetahui pengaruh strategi pembelajaran *project based learning* dengan media *loose parts* terhadap kreativitas anak kelompok B RA Perwanida Kecamatan Mojowarno Kabupaten Jombang. Penelitian ini menggunakan metode eksperimen, dengan desain penelitian *pre-eksperimental* jenis *one group pretest-posttest design*. Subjek penelitian ini merupakan anak kelompok B RA Perwanida Kecamatan Mojowarno Kabupaten Jombang sebanyak 30 anak. Teknik pengumpulan data melalui observasi non-partisipan dan dokumentasi berupa foto-foto kegiatan dan rencana pelaksanaan pembelajaran harian (RPPH). Pengolahan data dalam penelitian ini menggunakan uji hipotesis sampel berkorelasi statistik parametris. Hasil analisis data diperoleh T_{hitung} sebesar -24,04 dan T_{tabel} sebesar 2,002, sehingga $T_{hitung} < T_{tabel}$ yaitu $-24,04 < 2,002$, maka H_a diterima. Berdasarkan analisis data tersebut menunjukkan bahwa terdapat pengaruh signifikan antara strategi pembelajaran *project based learning* dengan media *loose parts* terhadap kemampuan kreativitas anak kelompok B RA Perwanida Kecamatan Mojowarno Kabupaten Jombang.

Kata Kunci : Strategi Pembelajaran *Project Based Learning* dengan Media *Loose Parts*, Kemampuan Kreativitas, Anak Usia Dini.

ABSTRACT

The aim of this research is to determine the effect of project based learning strategies using loose parts media on the creativity of group B Perwanida children, Mojowarno District, Jombang Regency. This research uses an experimental method, with a pre-experimental research design type one group pretest-posttest design. The subjects of this research were 30 children from group B RA Perwanida, Mojowarno District, Jombang Regency. Data collection techniques through non-participant observation and documentation in the form of photos of activities and daily learning implementation plans (RPPH). Data processing in this research use parametric statistical correlated sample hypothesis, testing. The result of data analysis obtained T_{count} of -24,04 and T_{table} of 2,002, so that $T_{\text{count}} < T_{\text{table}}$, namely $-24,04 < 2,002$, then H_a is accepted. Based on the data analysis, it show that there is a significant influence between project based learning strategies and loose parts media on the creative abilities of children in group B RA Perwanida, Mojowarno District, Jombang Regency.

Keyword: Project Based Learning Strategy with Loose Parts Media, Creativity Ability, Early Childhood.
