ABSTRACT

This study was motivated by the limited use of engaging learning media that are appropriate for the characteristics of elementary school students in Indonesian language learning. The study aimed to develop an illustrated E-Flipbook based on the folktale The Origin of Bangkalan that is valid, effective, and attractive for use in learning activities. This research employed the Research and Development (R&D) method using the 4D development model, which consists of the define, design, develop, and disseminate stages. The research subjects included expert validators, teachers, and elementary school students. Data were collected through validation sheets, observation sheets, learning achievement tests, and response questionnaires. The results showed that the illustrated E-Flipbook achieved a validity score of 93.3%, which falls into the highly valid category. The effectiveness of the media was indicated by teacher activity observation results of 100%, student activity observation results of 91%, learning outcomes of 88%, and a classical learning mastery level of 100%, placing it in the effective category. The attractiveness of the media was demonstrated by teacher responses of 100% and student responses of 94%, both categorized as highly attractive. Based on these findings, the illustrated E-Flipbook based on the folktale The Origin of Bangkalan was found to be valid, effective, and attractive, making it suitable for use in Indonesian language learning at the elementary school level.
