

ABSTRACT

Yetty Dewi Oktaviya. 200231100158. The Role of Village Funds on *Village Sustainable Development Goals* (SDGs) (Study on Villages in Pamekasan Regency). Under the guidance of Mr. Dr. Sutikno, S.E., M.E.

The purpose of this study is to see how much influence village funds, social resilience index, economic resilience index, and environmental resilience index have on improving *village sustainable development goals* (SDGs) in Pamekasan Regency villages. The data used are village fund data, social resilience index, economic resilience index, and environmental resilience index, the score of all Village SDGs in 2022 in 178 villages of Pamekasan Regency. This study used quantitative methods with *cross section* data. Data collection techniques are carried out by collecting data, information, and facts that can be measured which are then analyzed using multiple linear regression analysis methods. The research results of this study are; (1) Village fund variables have a negative and significant effect on improving *Village Sustainable Development Goals* (SDGs). (2) the variable of social resilience index has a positive and insignificant effect on improving the *sustainable development goals* (SDGs) of the Village. (3) economic resilience index variables have a positive and insignificant effect on improving *village sustainable development goals* (SDGs). (4) environmental resilience index variables have a positive and significant effect on improving *village sustainable development goals* (SDGs).

Keywords: Village Fund, *Village Sustainable Development Goals* (SDGs), Multiple Linear Regression Analysis

ABSTRAK

Yetty Dewi Oktaviya. 200231100158. Peran Dana Desa Terhadap *Sustainable Development Goals* (SDGs) Desa (Studi Pada Desa Di Kabupaten Pamekasan). Dibawah bimbingan Bapak Dr. Sutikno, S.E., M.E.

Tujuan penelitian ini untuk melihat seberapa besar pengaruh dana desa, indeks ketahanan sosial, indeks ketahanan ekonomi, dan indeks ketahanan lingkungan terhadap peningkatan *sustainable development goals* (SDGs) Desa di desa Kabupaten Pamekasan. Data yang digunakan adalah data dana desa, indeks ketahanan sosial, indeks ketahanan ekonomi, dan indeks ketahanan lingkungan, skor keseluruhan SDGs Desa tahun 2022 di 178 desa Kabupaten Pamekasan. Penelitian ini menggunakan metode kuantitatif dengan data *cross section*. Teknik pengumpulan data dilakukan dengan teknik menghimpun data, informasi, dan fakta yang dapat diukur yang kemudian dianalisis dengan menggunakan metode analisis regresi linier berganda. Hasil penelitian studi ini adalah; (1) variabel dana desa berpengaruh negatif dan signifikan terhadap peningkatan *sustainable development goals* (SDGs) Desa. (2) variabel indeks ketahanan sosial berpengaruh positif dan tidak signifikan terhadap peningkatan *sustainable development goals* (SDGs) Desa. (3) variabel indeks ketahanan ekonomi berpengaruh positif dan tidak signifikan terhadap peningkatan *sustainable development goals* (SDGs) Desa. (4) variabel indeks ketahanan lingkungan berpengaruh positif dan signifikan terhadap peningkatan *sustainable development goals* (SDGs) Desa.

Kata Kunci : Dana Desa, *Sustainable Development Goals* (SDGs) Desa, Analisis Regresi Linier Berganda
