

ABSTRAK

Afdhal Reza Prakarsa. Analisis Pengaruh Luas Lahan Panen, Jumlah Tenaga kerja dan Nilai Ekspor Terhadap PDRB Subsektor Tanaman Holtikultura di Kabupaten Bondowoso. Dibawah Bimbingan Titov Chuk's Mayvani, S.E., M.E.

Penelitian ini bertujuan untuk mengetahui pengaruh jangka panjang dan jangka pendek variable luas lahan panen terhadap PDRB subsector tanaman holtikultura di Kabupaten Bondowoso, mengetahui pengaruh jangka panjang dan jangka pendek variable jumlah tenaga kerja terhadap PDRB subsector tanaman holtikultura di Kabupaten Bondowoso, mengetahui pengaruh jangka panjang dan jangka pendek variable nilai ekspor terhadap PDRB subsector tanaman holtikultura di Kabupaten Bondowoso.

Penelitian ini menggunakan metode penelitian deskriptif dengan pendekatan penelitian kuantitatif dengan alat analisis Model ECM (*Error Correction Model*). Sumber data pada penelitian ini adalah data sekunder yang diperoleh dari Badan Pusat Statistik Kabupaten Bondowoso. Variable yang digunakan pada penelitian ini meliputi variable luas lahan panen, jumlah tenaga kerja, nilai ekspor dan PDRB subsector tanaman holtikultura.

Hasil penelitian menunjukkan (1) variable luas lahan panen dalam jangka pendek dan jangka panjang berpengaruh positif dan signifikan terhadap PDRB subsector tanaman holtikultura di Kabupaten Bondowoso. (2) variable tenaga kerja dalam jangka pendek berpengaruh negative dan tidak signifikan, sedangkan dalam jangka panjang berpengaruh positif tetapi tidak signifikan terhadap PDRB subsector tanaman holtikultura di Kabupaten Bondowoso. (3) variable nilai ekspor dalam jangka pendek dan jangka panjang berpengaruh positif dan signifikan terhadap PDRB subsector tanaman holtikultura di Kabupaten Bondowoso

Kata kunci : Produk Domestic Regional Bruto, Luas Lahan, Tenaga Kerja, Nilai Ekspor

ABSTRACT

Afdhal Reza Prakarsa. Analysis of the influence of the area of harvested land, the number of workers and the value of exports on the GRDP of the horticultural crop sub-sector in Bondowoso Regency. Under the guidance of Titov Chuk's Mayvani, S.E., M.E.

This study has an objective to determine the effect of long-term and short-term of variables of harvested area on GRDP of the horticultural crop sub-sector in Bondowoso Regency, to determine the effect of long-term and short-term of variables number of labors on GRDP of the horticultural crop sub-sector in Bondowoso Regency, to determine the effect of long-term and short-term of variables export value on GRDP of the horticultural crop sub-sector in Bondowoso Regency.

This study use a descriptive research method with a quantitative research approach with an analytical tool that is the ECM model (*Error Correction Model*). The source of data in this research is secondary data obtained from the Central Bureau of Statistics of Bondowoso Regency. The variables used ini this research include the area hervested land, the number of workers, the value of exports and the GRDP of the horticultural park sub-sector.

The results of the study show that (1) the variable of harvested area in the short term and long term has a positive and significant effect on the GRDP of the horticultural crop sub-sector in Bondowoso Regency. (2) the variable of labor in the short term has a negative and insignificant effect, while in the long term, it has a positive but insignificant effect on the GRDP of the horticultural crop sub-sector in Bondowoso Regency. (3) the variable of export value in the short term and long term has a positive and significant effect on the GRDP of the horticultural crop sub-sector in Bondowoso Regency.

Keywords: Gross Domestic Regional Product, Land Area, Labor, Export Value
