

ABSTRACT

Fajar Romadhon, Analysis of Income Levels of Salt Farmers in Pangarengan Village, Pangarengan District, Sampang Regency, Madura. The aim of this research is to find out and analyze whether capital, land area, wages and work experience have an influence on the income level of salt farmers in Pangarengan Village, Pangarengan District, Sampang Regency, Madura. This research uses a quantitative descriptive method with a sampling technique, namely purposive sampling. The population of all farmers in Pangarengan Village is 1093 and a sample of 70 salt farmers. Data collection techniques using questionnaires and documentation. Data analysis and processing used Eviews 13. Based on the results of the research that has been carried out, it can be seen that partially the variables capital, land area and work experience have a positive effect on the income of salt farmers in Pangarengan Village. Simultaneously, the independent variables (X) capital, land area, education and work experience have a significant effect on the dependent variable (Y) income of salt farmers in Pangarengan Village. In this research, it was found that during the last 6 years salt production in Sampang Regency was the highest in 2023.

Keywords: Capital, Land Area, Education, Work Experience

ABSTRAK

Fajar Romadhon, Analisis Tingkat Pendapatan Petani Garam di Desa Pangarengan Kecamatan Pangarengan Kabupaten Sampang Madura.
