

Rafiyanzah. 2024. *Pengembangan Lembar Kerja Peserta Didik Project Based Learning Berbasis Kearifan Lokal Onjhem Pada Mata Pelajaran IPAS Kelas IV SDN Saronggi I*. Skripsi, Program Studi Pendidikan Guru Sekolah Dasar, Fakultas Ilmu Pendidikan, Universitas Trunojoyo Madura. Pembimbing: Ana Naimatul Jannah, S.Pd., M.Pd

ABSTRAK

Tujuan penelitian pengembangan ini adalah (1) untuk mengevaluasi validitas LKPD Project Based Learning Berbasis Kearifan Lokal berdasarkan dari validasi para ahli (ahli materi, ahli bahan ajar, ahli desain pembelajaran), (2) untuk menilai keefektifan bahan ajar LKPD Project Based Learning Berbasis Kearifan Lokal berdasarkan dari lembar observasi aktivitas peserta didik, tes hasil belajar ranah kognitif peserta didik, dan observasi aktivitas guru, (3) untuk menilai kemenarikan LKPD Project Based Learning Berbasis Kearifan Lokal berdasarkan dari respon peserta didik dan respon guru. Penelitian ini menggunakan model penelitian ADDIE yang terdiri dari lima tahapan yaitu Analisis (analisis), Design (desain), Development (pengembangan), Implementation (implementasi), Evaluation (evaluasi). Penelitian ini dilakukan pada 14 peserta didik kelas IV di SDN Saronggi 1. Berdasarkan data yang diperoleh, validitas LKPD Project Based Learning Berbasis Kearifan Lokal mencapai 88% dari validasi ahli materi mendapatkan 95,2%, dari validasi ahli bahan ajar mendapatkan 88,2% dari validasi ahli desain pembelajaran mendapatkan 82% yang semuanya termasuk kedalam kategori sangat valid. Keefektifan diukur berdasarkan observasi aktivitas peserta didik yang mendapatkan 96,8%, tes hasil belajar ranah kognitif peserta didik mendapatkan 100%, dan observasi aktivitas guru mendapatkan 96%, semuanya termasuk kedalam kategori sangat efektif. Kemenarikan diperoleh dari angket respon peserta didik mendapatkan 97,7% dan angket respon guru mendapatkan 96%, semuanya termasuk kedalam kategori sangat menarik.

Kata kunci : Lembar Kerja Peserta Didik, Project Based Learning, Kearifan Lokal, Onjhem

Rafiyanzah. 2024. Development of Project Based Learning Student Worksheets Based on Onjhem Local Wisdom in Class IV Science and Science Subjects at SDN Saronggi I. Thesis, Primary School Teacher Education Study Program, Faculty of Education, Trunojoyo University Madura. Supervisor: Ana Naimatul Jannah, S.Pd., M.Pd

ABSTRACT

The objectives of this development research were (1) to evaluate the validity of local wisdom-based project-based learning based on the validation of experts (material experts, teaching materials experts, and learning design experts) and (2) to assess the effectiveness of local wisdom-based project-based learning based on teaching materials. Local Wisdom on student activity observation sheets, students' cognitive domain learning outcomes tests, and teacher activity observations (3) to assess the attractiveness of local wisdom-based project-based learning (LKPD) based on student responses and teacher responses. This research used the ADDIE research model, which consists of five stages: analysis (analysis), design (design), development (development), implementation (implementation), and evaluation (evaluation). This research was conducted on 14 class IV students at SDN Saronggi 1. Based on the data obtained, the validity of the LKPD Project-Based Learning Based on Local Wisdom reached 88% from the validation of the material expert, who got 95.2%, and from the validation of the teaching material expert, who got 88.2%. From the validation, learning design experts got 82%, all of which fell into the very valid category. Effectiveness was measured based on observations of student activities, which get 96.8%, tests on learning outcomes in the cognitive domain of students, which get 100%, and observations of teacher activities, which get 96%, all of which fall into the very effective category. The attractiveness obtained from the student response questionnaire was 97.7% and the teacher response questionnaire was 96%, all of which were included in the very interesting category.
