

ABSTRACT

Nurul Anika Wulandari, *An Analysis of profitability (ROA and ROE), leverage (DER), company size, and company age to (corporate social responsibility) CSR (A Study on mining companies listed on Indonesian Stock Exchange during 2012–2016). Under the guidance of Alexander Anggono, SE., M.Si., Ph.D dan Emi Rahmawati, SE., M.Si*

This study is aimed to find out the influence of profitability, leverage, company size, and company age to corporate social responsibility. The independent variables of this study are profitability (ROA and ROE), leverage (DER), company size, and company age, while the dependent is corporate social responsibility. This study is done at mining companies listed on Indonesian Stock Exchange during 2012–2016. The data is analyzed using multiple regression analysis, while the sample is taken through purposive sampling technique.

The result of this study shows that profitability (ROA and ROE) and leverage (DER) does not give any influence to corporate social responsibility. However, company age and company size gives influence to corporate social responsibility.

Keywords: Profitability, Leverage, Company Size, Company Age, and Corporate Social Responsibility
