ABSTRAK

Penelitian dan pengembangan ini bertujuan untuk mengembangkan bahan ajar ensiklopedia mnemonik tema 7 subtema 1 pembelajaran 5 kelas V yang valid, praktis, dan efektif. Model pengembangan yang digunakan adalah model 4D. Uji coba yang dilakukan yaitu uji coba ahli dan uji coba sasaran. Uji coba sasaran hanya dilakukan sampai uji coba terbatas karena adanya pandemi COVID-19. Subjek penelitian adalah para ahli, siswa kelas V, dan guru kelas V SDN Latukan. Teknik pengumpulan data menggunakan angket, observasi, dan tes. Analisis data menggunakan analisis deskriptif kualitatif dan kuantitatif. Hasil analisis data penelitian yang telah dilakukan menunjukkan rata-rata kevalidan dari para ahli memperoleh 84,6% (sangat valid). Kepraktisan ditinjau dari lembar observasi keterlaksanaan pembelajaran 70% (terlaksana) dan lembar observasi aktivitas siswa 86,8% (sangat aktif). Keefektifan ditinjau dari lembar angket respon siswa 76,6% (positif), lembar angket respon guru 70% (positif), dan lembar tes hasil belajar siswa ranah kognitif 100% (ketuntasan belajar klasikal yang baik). Berdasarkan analisis data tersebut, bahan ajar ensiklopedia mnemonik tema 7 subtema 1 pembelajaran 5 kelas V dapat dikatakan valid, praktis, dan efektif.

Kata Kunci: Bahan ajar ensiklopedia mnemonik, model 4D.

Fakhrudiana Zahroh. 2021. Development of Teaching Materials Encyclopedia Mnemonik Theme 7 Sub-theme 1 Learning 5 Grade V. Thesis, Primary School Teacher Education Study Program, Faculty of Education, Trunojoyo Madura University. Advisor: Andika Adinanda Siswoyo.

ABSTRACT

This research and development aims to develop mnemonic encyclopedia teaching materials theme 7 sub-themes 1 learning 5 grade V valid, practical, and effective. The development model used is the 4D model. The trials are expert trials and target trials. Target trials are only conducted until limited trials due to the COVID-19 pandemic. The subjects of the study were experts, grade V students, and grade V teachers at SDN Latukan. Data collection techniques using questionnaires, observations, and tests. Data analysis using qualitative and quantitative descriptive analysis. The results of the analysis of research data that has been done showed the average validity of the experts obtained 84.6% (very valid). Practicality is reviewed from the observation sheet of 70% (carried out) learning implementation and 86.8% (very active) student activity observation sheet. Effectiveness was reviewed from the student response questionnaire 76.6% (positive), teacher response questionnaire 70% (positive), and test sheet of 100% cognitive field student learning results (good classical learning completion). Based on the analysis of the data, the teaching materials of the mnemonic encyclopedia theme 7 sub-themes 1 learning 5 grade V can be said to be valid, practical, and effective.

Keywords: Teaching materials mnemonic encyclopedia, 4D models.
