

ABSTRAK

Nurul Arofah (2018), Evaluasi Dampak Program Pemberdayaan Kelompok Nelayan dalam Meningkatkan Kesejahteraan Masyarakat di Desa Pulau Mandangin Kecamatan Sampang Kabupaten Sampang, Dibawah bimbingan Dr. Kurniyati Indah Sari, Msi.

Tujuan penelitian ini adalah untuk mengetahui dampak program pemberdayaan kelompok nelayan dalam meningkatkan kesejahteraan masyarakat Desa Pulau Mandangin Kecamatan Sampang Kabupaten Sampang. Penelitian ini menggunakan metode deskriptif kuantitatif. Penentuan responden dengan menggunakan *purposive sampling*. Sampel dalam penelitian ini adalah nelayan yang menggunakan kapal kecil atau nelayan eder di Desa Pulau Mandangin Kecamatan Sampang Kabupaten Sampang sebanyak 85 responden yang mengikuti program. Analisis yang digunakan adalah statistik deskriptif dan *t-test paired sampel*.

Hasil analisis data menunjukkan bahwa tingkat signifikan 5% didapatkan rata-rata pada tingkat pengetahuan nelayan dan tingkat penghasilan nelayan sebelum dan sesudah mengikuti program adalah sama/tidak berbeda secara nyata, hal ini menunjukkan bahwa kegiatan program pemberdayaan kelompok nelayan yang dilaksanakan di Desa Pulau Mandangin tidak memberikan dampak pemberdayaan terhadap nelayan, terbukti kurangnya respon nelayan untuk meningkatkan pengetahuan dan pendapatannya. Sedangkan tingkat signifikan 5% didapatkan rata-rata pada tingkat prakteknya nelayan sebelum dan sesudah mengikuti program adalah terdapat perbedaan secara nyata, hal ini menunjukkan bahwa kegiatan program pemberdayaan kelompok nelayan yang dilaksanakan di Desa Pulau Mandangin memberikan dampak pemberdayaan terhadap nelayan, terbukti adanya respon nelayan saat adanya program pemberdayaan dan nelayan mampu menekuni kemampuan prakteknya yang didapatkan dengan cara membina individu nelayan agar dapat meningkatkan pendapatan secara mandiri. Pendapatan akan meningkat jika nelayan tersebut mau berubah secara sadar demi meningkatkan pendapatan masing-masing.

Kata Kunci: Program Pemberdayaan, Tingkat Pengetahuan, Tingkat Praktek dan Tingkat Penghasilan

Abstract

The purpose of this research is to know the impact of the program of empowerment of the program a group of marine fishing account for improve the welfare of members of the village community the island of mandangin sub-district sampang district sampang. Was used in the study a method of descriptive of quantitative. The determination of the smallest number of respondents by the use of purposive the sampling method of. By smeru within the of this research is a fisherman who use a small vessel or fishing for eder in his home village of the island of mandangin sub-district sampang district sampang as many as 85 the number of respondents who opt out of the. The analysis used is descriptive statistics and t-test paired in the entire household sample.

The results of the analysis data show that a significant degree or the average 5 percent at the knowledge fishermen and the level income fishermen before and after scheme is the same no different real, this shows that the empowerment program fishing communities who carried out in village island mandangin not an impact empowerment to fishermen, proven lack of response fishermen to increase knowledge and their income. While a significant degree 5 % these chareges in the future averages for each fishermen who sell their goods in fact the practice before and after opt out of the is there was a gap in to be gained from a, this may indicate that the program activities of empowerment of the program fishing communities who carried out in villages the island of mandangin an impact of per dollar on tuesday against empowerment fishermen who sell their goods, prove to be the case that they receive input fishermen at the provision of this program empowerment and there are approximately fishermen who capable of being wealthy because of the ability in fact the practice day what part of it by means of individual so they can be of the things which were fishermen who sell their goods to make it capable in to raise the income of play an independent. Net income will increase if fishermen who sell their goods here on wednesday and thursday change terror of being conscious of for the sake of to raise the income of each.

Keywords: empowerment program, the knowledge, the practice and incomes.
