

ABSTRACT

Dwi Safitri, Analysis of the Influence of Original Village Income, Transfer Funds, and Other Income on Village Financial Independence (Study in Villages in Bojonegoro Regency). Under the guidance of Muhammad Asim Asy'ari, S.E., M.Ak.

This research aims to determine the magnitude of the influence of village original income, transfer funds and other income in villages in Bojonegoro Regency, both simultaneously and partially on village financial independence. In this research, researchers used quantitative methods. The method used in sampling is a purposive technique, where sampling is carried out randomly based on certain criteria according to the research topic. The data analysis techniques used in this research are descriptive analysis, multiple linear regression analysis, classical assumption test, hypothesis test analysis, correlation coefficient analysis, and coefficient of determination analysis. The research results show that the variables of village original income and other income simultaneously have a significant effect on village financial independence. Then, from the results of the partial test (t), it can be concluded that the village's original income and other income have a significant effect on the village's financial independence. Meanwhile, the transfer funds variable has extreme values and is not suitable for testing which could pose a high risk to the village's financial independence.

Keywords: *Village Original Income, Transfer Funds, Other Income, and Village Financial Independence.*

ABSTRAK

Dwi Safitri, Analisis Pengaruh Pendapatan Asli Desa, Dana Transfer, dan Pendapatan Lain-lain Terhadap Kemandirian Keuangan Desa (Studi Pada Desa Se-Kabupaten Bojonegoro). Dibawah bimbingan Muhammad Asim Asy'ari, S.E., M.Ak.

Penelitian ini bertujuan untuk mengetahui besarnya pengaruh pendapatan asli desa, dana transfer, dan pendapatan lain-lain pada desa di Kabupaten Bojonegoro, baik secara simultan maupun secara parsial terhadap kemandirian keuangan desa. Dalam penelitian ini, peneliti menggunakan metode kuantitatif. Metode yang digunakan dalam pengambilan sampel yaitu dengan teknik *purposive*, dimana dalam pengambilan sampel dilakukan secara acak berdasarkan kriteria-kriteria tertentu sesuai pada topik penelitian. Teknik analisis data yang digunakan dalam penelitian ini adalah analisis deskriptif, analisis regresi linear berganda, uji asumsi klasik, analisis uji hipotesis, analisis koefisien korelasi, dan analisis koefisien determinasi. Hasil penelitian menunjukkan bahwa secara simultan variabel pendapatan asli desa dan pendapatan lain-lain secara bersama-sama berpengaruh signifikan terhadap kemandirian keuangan desa. Kemudian dari hasil uji parsial (t) dapat disimpulkan bahwa pendapatan asli desa dan pendapatan lain-lain berpengaruh signifikan terhadap kemandirian keuangan desa. Sedangkan, variabel dana transfer memiliki nilai ekstrim dan tidak layak untuk di uji yang dapat memberikan resiko tinggi terhadap kemandirian keuangan desa.

Kata Kunci: *Pendapatan Asli Desa, Dana Transfer, Pendapatan Lain-lain, dan Kemandirian Keuangan Desa.*
