

ABSTRACT

Sonia Ika Silvianah, Ris Yuwono Yudo Nugroho as lecturer, Factors Determining Indonesian Coffee Exports,

This study aims to determine the influence of domestic coffee production, world coffee prices, exchange rates and dummy on coffee exports in Indonesia during 2016-2020 in the long and short term. The data used is a time series from January 2016 to December 2020, which was collected from Bank Indonesia, BPS and Trading Economics. The variables used include: coffee exports as dependent variables, domestic coffee production, world coffee prices, exchange rates and pandemic dummy as independent variables. This research uses a quantitative approach with the method used is the Error Correction Model (ECM). The analytical techniques used are: Data stationarity test, Cointegration Test, Long-term and short-term ECM Test and Classical Assumption Test. The results showed that in the long term, coffee production variables have a positive and significant effect on Indonesian coffee exports, world coffee prices have a positive and significant effect on Indonesian coffee exports, the exchange rate has a positive and significant effect on Indonesian coffee exports and the dummy pandemic does not affect Indonesian coffee exports. In the short term, the coffee production variable does not affect Indonesia's coffee exports, world coffee prices have no effect on Indonesian coffee exports, the exchange rate has no effect on Indonesian coffee exports and the pandemic dummy does not affect Indonesia's coffee exports.

Keywords: *Coffee Export, Coffee Production, World Coffee Price, Dummy, Error Correction Model (ECM).*
