

Abstract

Husin, Analysis of the Economic Development of Islamic Boarding Schools Case Study at the Ibnu Cholil Bangkalan Islamic Boarding School. Under the guidance of Dr. Eni Sri Rahayuningsih, S.E., M.E

The research aims to find out the condition of consumption, income, savings, and business units at the Ibnu Cholil Bangkalan Islamic Boarding School. The methodology used in this study is qualitative descriptive. The method of data collection is through interviews and documentation. The results of the study show that the income of the Ibnu Cholil Islamic boarding school comes from the annual money paid by the students and the registration money of new students. Second, for consumption in the Ibnu Cholil Islamic boarding school, it is managed and planned by the administrators of the Islamic boarding school. Third, the Ibnu Cholil Islamic boarding school also has a saha unit which includes, laundry services, gallon water services, cooperatives, and catfish cultivation. In addition to being used for the development of Islamic boarding schools, the business unit is also one of the businesses of Islamic boarding schools to obtain income, but is also used as a means of empowerment for students.
