

ABSTRACT

Renata Rizki Pratiwi, The Impact of the Family Hope Program on Poverty Alleviation in Duriwetan Village, Maduran District, Lamongan Regency. Under the guidance of Dr. Mohtar Rasyid, S.E., M.Sc.

The purpose of this study was to find out and analyze the impact of the family hope program (PKH) on poverty alleviation in Duriwetan Village, Maduran District, Lamongan Regency. This study used quantitative data types with propensity score matching techniques. Propensity score matching is used to compare characteristics between the comparison group (treatment) and the control group. Sampling was carried out by comparing the beneficiary families of the family hope program with families who did not get the family hope program. The variables used in this study are poverty characteristics determined by the Central Statistics Agency (BPS) and data obtained secondarily through the Village Sustainable Development Goals questionnaire. The hypothesis of this study is that the family hope program has an impact on poverty alleviation in Duriwetan Village, Maduran District, Lamongan Regency. Based on the results of the tests carried out, it shows that the hypothesis is acceptable. The conclusion of this study is that the family hope program has an impact on poverty alleviation in Duriwetan Village, Maduran District, Lamongan Regency. The impact of family hope programs such as an increase in the per capita income of beneficiary families. Families who are beneficiaries of the family hope program with families who do not get the family hope program have differences in terms of income and are not on target for the recipient's family.

Keywords: family hope program, poverty alleviation, propensity score matching.

ABSTRAK

Renata Rizki Pratiwi, Dampak Program Keluarga Harapan Terhadap Pengentasan Kemiskinan Di Desa Duriwetan Kecamatan Maduran Kabupaten Lamongan. Dibawah bimbingan Dr. Mohtar Rasyid, S.E.,M.Sc.

Tujuan penelitian ini adalah untuk mengetahui dan menganalisis dampak program keluarga harapan (PKH) terhadap pengentasan kemiskinan di Desa Duriwetan Kecamatan Maduran Kabupaten Lamongan. Penelitian ini menggunakan jenis data kuantitatif dengan teknik propensity score matching. *Propensity score matching* digunakan untuk membandingkan karakteristik antara kelompok pembanding (*treatment*) dengan kelompok control. Pengambilan sampel dilakukan dengan cara membandingkan keluarga penerima manfaat program keluarga harapan dengan keluarga yang tidak mendapatkan program keluarga harapan. Variabel yang digunakan dalam penelitian ini yaitu karakteristik kemiskinan yang ditentukan oleh Badan Pusat statistic (BPS) dan data yang diperoleh secara sekunder melalui kuesioner *Sustainable Development Goals* Desa (SDGs Desa). Hipotesis penelitian ini yaitu program keluarga harapan memiliki dampak terhadap pengentasan kemiskinan di Desa Duriwetan Kecamatan Maduran Kabupaten Lamongan. Berdasarkan hasil pengujian yang dilakukan menunjukan bahwa hipotesis dapat diterima. Kesimpulan penelitian ini yaitu program keluarga harapan berdampak terhadap pengentasan kemiskinan di Desa Duriwetan Kecamatan Maduran Kabupaten Lamongan. Dampak yang ditimbulkan dari program keluarga harapan seperti peningkatan pendapatan perkapita keluarga penerima manfaat. Keluarga penerima manfaat program keluarga harapan dengan keluarga yang tidak mendapatkan program keluarga harapan memiliki perbedaan dari segi pendapatan dan tidak tepat sasaran keluarga penerima.

Kata kunci: program keluarga harapan, pengentasan kemiskinan, propensity score matching.
