ABSTRAK

Penelitian ini bertujuan untuk menganalisis hasil belajar siswa kelas X TKJ SMK Ifadah Bangkalan saat menyelesaikan soal pada mata pelajaran pemrograman dasar materi *algoritma* ditinjau dari kepribadian siswa. Metode menggunakan kualitatif deskriptif. Sampel dalam penelitian ini sebanyak 6 siswa yaitu 3 siswa memiliki tipe kepribadian *ekstrovert* dan 3 siswa memiliki tipe kepribadian *introvert*. Data yang dikumpulkan dengan menggunakan tes hasil belajar materi *algoritma* dengan teknik pengambilan datanya menggunakan *purposive sampling* sebagai sampel penelitian. Pengumpulan informasi dilakukan menggunakan angket dan tes soal. Pengolahan data diperoleh dari analisis data dan triangulasi sumber sebagai penguji keabsahan data.. Adapun faktor yang menyebabkan peserta didik memiliki hasil belajar rendah, yaitu kemampuan berfikir, metode mengajar guru, sarana/kondisi gedung, dan lingkungan keluarga. Siswa dengan tipe kepribadian *ekstrovert* di SMK Ifadah Sukolilo Timur, Labang Bangkalan dapat mengerjakan soal jenis kognitif C2,C3, dan C4 dengan d baik dan dapat dikelompokkan menjadi siswa yang memiliki hasil belajar tingkat tinggi. Tiga siswa berkepribadian *ekstrovert* dapat mengerjakan soal dengan baik meski jawabannya ada yang kurang jelas. Siswa dengan kepribadian *introvert* di SMK Ifadah Sukolilo Timur, Labang Bangkalan dapat mengerjakan soal jenis kognitif C2,C3, dan C4 meski jawaban siswa terlalu singkat. Tiga siswa berkepribadian *introvert* dapat mengerjakan soal meski ada soal yang dijawab terlalu singkat.

ABSTRACT

This research aims to analyze the learning outcomes of class The method uses descriptive qualitative. The sample in this study was 6 students, namely 3 students had an extrovert personality type and 3 students had an introvert personality type. Data was collected using algorithmic material learning outcomes tests with data collection techniques using purposive sampling as the research sample. Information was collected using questionnaires and test questions. Data processing is obtained from data analysis and triangulation of sources as a test of data validity. The factors that cause students to have low learning outcomes are thinking ability, teacher teaching methods, building facilities/conditions, and family environment. Students with an extrovert personality type at East Sukolilo Ifadah Vocational School, Labang Bangkalan can do C2, C3 and C4 cognitive type questions well and can be grouped into students who have high level learning outcomes. Three students with extroverted personalities were able to do the questions well even though some of the answers were unclear. Students with introverted personalities at East Sukolilo Ifadah Vocational School, Labang Bangkalan were able to answer C2, C3 and C4 cognitive type questions even though the students' answers were too short. Three students with introverted personalities were able to work on the questions even though some of the questions were answered too briefly.
