

Afifatul Mauqunah, 2024. Efektivitas Media Papan Tebak Panca Indera untuk Menstimulasi Kognitif Berpikir Logis Anak. Fakultas Keguruan dan Ilmu Pendidikan. Universitas Trunojoyo Madura. Pembimbing: Dwi Nurhayati Adhani, S.Psi., M.Psi

ABSTRAK

Penelitian ini bertujuan untuk mengetahui efektivitas media papan tebak panca indera untuk menstimulasi kognitif berpikir logis anak. Penelitian ini merupakan penelitian kuantitatif eksperimen. Objek penelitian ini adalah anak usia 4-5 tahun di RA Mambaul Ulum pakandangan Tengah bluto sumenep dengan jumlah populasi 30 anak yang kemudian diambil seluruhnya sebagai sampel penelitian. Metode pengumpulan data didasarkan pada hasil tes observasi sebelum diberikan perlakuan dan hasil posstest diberikan perlakuan. Berdasarkan hasil penelitian diketahui bahwa terdapat pengaruh efektivitas media papan tebak panca indera untuk menstimulasi kognitif berpikir logis anak. Terbukti dari hasil penelitian dengan menggunakan uji Wilcoxon dalam uji hipotesis untuk membuktikan adanya pengaruh bebas independen terhadap variabel terikat. Hasil *wilcoxon signed test* menunjukkan nilai Z sebesar 1.576 dan nilai *asympt sig. (2-tailed)* 0.034 lebih kecil dari 0,05, dari hasil tersebut maka H_0 ditolak dan H_a diterima. Penelitian ini memberikan kontribusi untuk memahami efektivitas media papan tebak panca indera untuk menstimulasi kognitif berpikir logis anak kelas A RA Mambaul Ulum.

Kata kunci : kognitif, media papan tebak panca indera, berpikir logis, anak usia dini.

Afifatul Mauqunah, 2024. The Effectiveness of the Five Senses Guessing Board Media to Simulate Children's Logical Thinking Cognition. Faculty of Teacher Training and Education. Trunojoyo University of Madura. Supervisor: Dwi Nurhayati Adhani, S.Psi., M.Psi

ABSTRACT

This study aims to determine the effectiveness of the five senses guessing board media to stimulate children's logical thinking cognition. This study is an experimental quantitative research. The object of this study is children aged 5-6 years in RA Mambaul Ulum pakandangan Tengsh bluto sumenep with a population of 30 children which were then taken as a research sample. The data collection method is based on the results of the observation test before were given treatment and the results of the posstest were given treatment. Based on the results of the study, it is known that there is an effect of the effectiveness of the five senses guessing board media to stimulate children's logical thinking cognition. It is evident from the results of the study by using the Wilcoxon test in the hypothesis test to prove the existence of an independent independent influence on the bound variable. The results of the wilcoxon signed test showed a Z value of 1,576 and an asymp value of sig. (2- tailed) 0.034 is less than 0.05, from this result Ho is rejected and Ha is accepted. This research contributes to understanding the effectiveness of the five senses guessing board media to stimulate the cognitive logical thinking of grade A children of RA Mambaul Ulum.

Keywords: *cognitive, five-sense guessing board media, logical thinking, early childhood.*
