Agustin Rachmad Wahyu Purnanti. 180541100061. Pengaruh antara *Perceived Social Support* terhadap Penyesuaian Diri pada Remaja Tunadaksa Korban *Bullying*. Skripsi. Program Studi Psikologi. Fakultas Ilmu Sosial dan Ilmu Budaya. Universitas Trunojoyo Madura.

Penelitian ini bertujuan untuk mengetahui pengaruh antara *perceived social support* terhadap penyesuaian diri pada remaja tunadaksa korban *bullying*. Penelitian ini menggunakan pendekatan kuantitatif dengan Teknik *purposive sampling*. Responden dalam penelitian ini adalah remaja tunadaksa korban *bullying* di Surabaya dengan jumlah 100 responden. Instrumen penelitian ini adalah penyesuaian diri dan *perceived social support*. Analisis yang digunakan dalam penelitian ini adalah uji regresi linear sederhana dengan menggunakan bantuan program SPSS 24 *for windows*. Adapun hasil analisis data menunjukkan koefisien regresi sebesar $F = 109,429$ dengan signifikansi $0,000 < 0,05$, dengan demikian, terdapat pengaruh *perceived social support* terhadap penyesuaian diri. Sumbangan efektif pengaruh *perceived social support* terhadap penyesuaian diri remaja tunadaksa korban *bullying* diperoleh uji R square sebesar 0,523. Artinya sebesar 52,3 % penyesuaian diri dipengaruhi oleh *perceived social support*.

Kata kunci : *Perceived Social Support*, Penyesuaian Diri, Remaja Tunadaksa Korban *Bullying*.

ABSTRACT

Agustin Rachmad Wahyu Purnanti. 180541100061. The Influence of *Perceived Social Support* on Self-Adjustment in Adolescents with Physical Disability Victims of *Bullying*. Thesis. Psychology Study Program. Faculty of Social Sciences and Cultural Sciences. Trunojoyo Madura University.

This study aims to determine the effect of *perceived social support* on adjustment in disabled adolescents who are victims of *bullying*. This study used a quantitative approach with a *purposive sampling technique*. Respondents in this study were disabled youth victims of *bullying* in Surabaya with a total of 100 respondents. The research instrument is self-adjustment and *perceived social support*. The analysis used in this study is a simple linear regression test using the SPSS 24 for windows. The results of the data analysis show a regression coefficient of $F = 109.429$ with a significance of $0.000 < 0.05$, thus, there is an influence of *perceived social support* on self-adjustment. The effective contribution of *perceived social support* to the adjustment of disabled adolescents to victims of *bullying* was obtained by the R square test of 0.523. This means that 52.3% of self-adjustment is influenced by *perceived social support*.

Keywords: *Perceived Social Support*, Adjustment, Adolescents with Physical Disability Victims of *Bullying*.
