

## **HALAMAN PERSEMBAHAN**

Skripsi ini saya persembahkan sepenuhnya kepada kedua orang hebat dalam hidup saya, Bapak dan Ibu. Keduanya lah yang telah membuat segalanya menjadi mungkin sehingga saya bisa sampai pada tahap dimana skripsi ini akhirnya selesai. Terimakasih atas segala pengorbanan, nasihat dan doa baik yang tidak pernah berhenti kalian berikan kepada saya. Ketika dunia menutup pintunya pada saya, Bapak dan Ibu membuka lengannya untuk saya. Ketika banyak orang tutup menutup telinga mereka untuk saya, mereka berdua membuka hati untuk saya. Terimakasih Bapak dan Ibuku tersayang. Serta saya persembahkan kepada orang-orang baik yang saya temui dimasa sulit selama pengerjaan skripsi ini.

## **ABSTRACT**

Indri Laila Sifaa, Effect of Population, Open Unemployment Rate, Human Development Index and Economic Growth on Poverty in East Java Province in 2017-2021. Under the guidance of Dr. Zakik S.E., M.Sc

Poverty is one of the problems in a complex and multidimensional economy, therefore a solution is needed to overcome and reduce poverty.

The purpose of this study was to analyze the Effect of Total Population, Open Unemployment Rate (TPT), Human Development Index (IPM) and Economic Growth on Poverty in East Java Province in 2017-2021. Research data was obtained from the Central Bureau of Statistics for East Java Province in 2017-2021. The analytical tool used in this study is panel data regression with the model used is Fixed Effect.

Based on the results of the study, it was found that partially: (1) Total population has a positive effect on the poverty rate in East Java Province in 2017-2021. (2) The Open Unemployment Rate (TPT) has a positive effect on the poverty rate in East Java Province in 2017-2021. (3) The Human Development Index (IPM) has a negative effect on the poverty rate in East Java Province for the 2017-2021 period. (4) Economic Growth has no effect on the poverty rate in East Java Province in 2017-2021.

While viewed simultaneously Population, Open Unemployment Rate, Human Development Index and Economic Growth affect the level of poverty in the province of East Java. As well as the independent variables in the study which include population, Open Unemployment Rate, HDI, and Economic Growth are able to explain the dependent variable, namely the Poverty Rate of 98.96 percent, while the remaining 1.04 percent is explained by other factors not included in the research model This.

Keywords: poverty, population, unemployment, Human Development Index, Economic Growth
