

ABSTRACT

Irbatun Nadhifah, "Analysis of Income Differences Between Partner and Non-Partner Sugarcane Farmers at the Tjoekir Jombang Sugar Factory (Case Study: Sumobito District, Jombang Regency) under the guidance of Mr. Titov Chuk's Mayvani, S.E., M.E

The purpose of this study was to determine and analyze the differences in income of partner and non-partner sugarcane farmers. And to analyze the differences in total income costs of partner and non-partner sugarcane farmers. And to analyze the differences in income transaction costs of partner and non-partner sugarcane farmers at the Tjoekir Jombang Sugar Factory. The research method uses a quantitative description approach using a different test model and Eviews 12 analysis tool. Meanwhile, the data collection method uses a questionnaire addressed to 30 partner sugarcane farmers and 30 non-partner sugarcane farmers. Based on the results of the Wilcoxon test above, the p value of the test results <0.05 , it can be concluded that there is a statistically significant difference in income between contract and non-contract farmers. The results of the normality test on HR costs and overhead costs show a p value <0.05 , then the data is considered statistically significant between partner and non-partner sugarcane farmers. The results of the normality test on transaction costs show a p value <0.05 , then the data is considered statistically significant between partner and non-partner sugarcane farmers.

Keywords: *Income, Sugarcane Farmers, Partners, Non-Partners*

ABSTRAK

Irbatun Nadhifah, “Analisis Perbedaan Pendapatan Antara Petani Tebu Mitra dan non mitra Pada Pabrik Gula Tjoekir Jombang (Studi Kasus: Kecamatan Sumobito Kabupaten Jombang)” dibawah bimbingan Bapak Titov Chuk’s Mayvani, S.E., M.E

Tujuan penelitian ini yaitu untuk mengetahui dan menganalisis perbedaan pendapatan petani tebu mitra dan non mitra. Serta menganalisis perbedaan pendapatan total biaya petani tebu mitra dan non mitra. Dan menganalisis perbedaan pendapatan biaya transaksi petani tebu mitran dan non mitra pada pabrik Gula Tjoekir Jombang. Metode penelitian menggunakan pendekatan deskripsi kuantitatif dengan menggunakan model uji beda dan alat analisis Eviews 12. Sedangkan, metode pengumpulan data menggunakan kuisisioner yang ditujukan kepada 30 petani tebu mitra dan 30 petani tebu non mitra. Berdasarkan hasil Hasil uji wilcoxon diatas, nilai p dari hasil uji $< 0,05$, maka dapat disimpulkan bahwa ada perbedaan pendapatan yang signifikan secara statistik antara petani kontrak dan non-kontrak. Hasil uji normlitas pada biaya SDM, dan biaya overhead menunjukkan nilai $p < 0,05$, maka data dianggap signifikan secara statistik anatra petani tebu mitra dan non mitra. Hasil uji normlitas pada biaya transaksi menunjukkan nilai $p < 0,05$, maka data dianggap signifikan secara statistik antara petani tebu mitra dan non mitra.

Kata Kunci: Pendapatan, Petani Tebu, Mitra, Non Mitra
