

ABSTRAK

Yustina Andriani, Analisis Faktor-Faktor Yang Mempengaruhi Pendapatan Nelayan Pemilik Kapal (Juragan Darat&Laut) Di Desa Sotabar Kecamatan Pasean Kabupaten Pamekasan. Dibawah bimbingan Henny Oktavianti SE., ME.

Tujuan penelitian ini untuk mengetahui dan menganalisis faktor-faktor yang mempengaruhi pendapatan nelayan pemilik kapal di desa Sotabar Kecamatan Pasean Kabupaten Pamekasan yang meliputi variabel dependen pendapatan dan variabel independen yaitu variabel modal, tenaga kerja, jarak tempuh melaut dan pengalaman kerja.

Data yang digunakan dalam penelitian ini yaitu data primer dengan jumlah responden 70 orang dari populasi nelayan pemilik kapal juragan darat dan laut sebanyak 180 orang. Metode yang digunakan dalam penelitian ini adalah metode OLS (*Ordinary Least Square*) dengan analisis regresi linear berganda dan asumsi klasik menggunakan bantuan eviews 6.0.

Hasil penelitian ini menunjukkan bahwa modal kerja, tenaga kerja, jarak tempuh melaut dan pengalaman kerja secara simultan berpengaruh signifikan dan positif terhadap pendapatan nelayan pemilik kapal. Namun, secara parsial semua variabel independen tenaga kerja, jarak tempuh melaut dan pengalaman kerja berpengaruh signifikan dan positif terhadap pendapatan nelayan kecuali variabel modal kerja berpengaruh negatif dan signifikan terhadap pendapatan nelayan pemilik kapal.

Kata Kunci: *Pendapatan Nelayan Pemilik Kapal, Modal kerja, Tenaga Kerja, Jarak tempuh Melaut dan Pengalaman Kerja*

ABSTRACT

Yustina Andriani, The Analysis of Factors Influencing on Income of the ship owner Fishermen (Land and Sea bosses) in Sotabar Village, Districts Pasean, Pamekasan District. Advisor: Henny Oktavianti SE., ME.

The purpose of this research was to find out and to analyze factors that influence the income of the ship owner fishermen in Sotabar Village, Districts Pasean, Pamekasan District which included dependent variable of income and independent variable of capital, labors, mileage of fishing and working experience.

The data of this research was primarily taken from interview of 70 respondents from 180 populations of people who owned the most boats business in the land. OLS (Ordinary Least Square) Method was held in this research with analysis of Multiple Linear Regression and classic assumption with assistance of eview 6.0.

The result showed that working capital, labors, mileage of fishing and working experience simultaneously affected the income of fishermen in significant and positively to those fishermen who owned boats business. However, partially all the independent variables of labors, mileage of fishing and working experience affected significantly and positively toward fishermen income other than variable of working capital which affected negatively and significantly toward the income of those who owned the most boat business.

Keywords: *income of the ship owner fishermen, working capital, labors, mileage of fishing, working experience.*
