ABSTRACT

His research aims to develop a learning evaluation tool using the Wondershare Quiz Creator application for the basic skills subjects in the 10th grade of TKJ (Computer and Network Engineering) at SMKN 3 Bangkalan. This research follows the R&D (Research and Development) model known as ADDIE, which stands for Analysis, Design, Development, Implementation, and Evaluation. The data used in this study includes interview results, tests, and questionnaires. The developed product utilizes the Wondershare Quiz Creator application. The research data was obtained from the results of expert validation questionnaires on content, evaluation, media, and student response. Based on the content expert's validation, a score of 96% was achieved, indicating "Very Suitable." The evaluation expert obtained a score of 100% with the comment "Very Suitable." The media expert validation resulted in a score of 98% with the comment "Very Suitable." The small group trial yielded a score of 97%, while the large group trial obtained a score of 96% with the comment "Very Suitable." Therefore, the learning evaluation tool using the Wondershare Quiz Creator application for the basic skills subjects is highly suitable for use.
