This research aims to know the description of fear of being single in a career woman in Pamekasan district. This study used a qualitative method with descriptive approach. Methods of data collection using semi-structured interviews and data analysis techniques used in this study is a model of Miles and Huberman namely data reduction, data presentation, and conclusion. Subjects were selected using technique purposive sampling with three subjects and using the following criteria: career women who live single early adult 18-40 years old and come from Pamekasan. The results of this study indicate that single fear (fear of being single) is visible from the four aspects of the fear of being single: 1) Fear not having the long-term companionship of an intimate partner; the subjects in this study cannot imagine that without their partner in life, because for the subject partner is a companion figure so that it makes the serious subject in a relationship dating. 2) Fear growing old alone; The subject was afraid of becoming an old maid or not sell. 3) Fear never having children or a family; Subject fear when he married late, the subject will have difficulty having children. 4) Fear feeling worthless or bad about themselves; Subject to think if the attitude of the mother is too set the subject's life has made the subject does not get married.

ABSTRAK

Ifni Sagita Yuanda Azis. 130541100087. Ketakutan Melajang (*Fear of Being Single*) pada Wanita Karier Di Kabupaten Pamekasan. Skripsi. Program Studi Psikologi. Jurusan Ilmu Sosial dan Ilmu Budaya. Fakultas Ilmu Sosial dan Ilmu Budaya. Universitas Trunojoyo Madura. 2017. xvii + 90 halaman dan 16 lampiran.

Penelitian ini bertujuan untuk mengetahui gambaran ketakutan melajang (*fear of being single*) pada wanita karier di kabupaten Pamekasan. Penelitian ini menggunakan metode kualitatif dengan pendekatan deskriptif. Metode pengumpulan data menggunakan wawancara semi terstruktur dan teknik analisis data yang digunakan dalam penelitian ini adalah model Miles dan Huberman yakni reduksi data, penyajian data, dan penarikan kesimpulan. Subjek dipilih dengan menggunakan teknik *purposive sampling* dengan tiga orang subjek dan menggunakan kriteria: perempuan karier yang hidup melajang berusia dewasa awal 18-40 tahun dan berasal dari Kabupaten Pamekasan. Hasil dari penelitian ini menunjukkan bahwa ketakutan melajang (*fear of being single*) terlihat dari empat aspek *fear of being single* yaitu: 1) *Fear not having the long-term companionship of an intimate partner*; subjek dalam penelitian ini tidak dapat membayangkan jika tanpa adanya pasangan dalam hidupnya, karena bagi subjek pasangan merupakan sosok pendamping hidup sehingga hal tersebut membuat subjek serius dalam menjalin hubungan berpacaran. 2) *Fear growing old alone*; Subjek merasa takut menjadi perawan tua atau tidak laku. 3) *Fear never having children or a family*; Subjek merasa takut jika ia telat menikah, subjek akan kesulitan memiliki anak. 4) *Fear feeling worthless or bad about them selves*; Subjek berpikir jika sikap dari ibunya yang terlalu mengatur kehidupan subjek telah membuat subjek tidak segera menikah.

Kata Kunci : Ketakutan Melajang, Perempuan, Lajang, Dewasa Awal, Karier.
