ABSTRAK

Abstrak: Penelitian ini bertujuan untuk mengembangkan *E-Book* Interaktif pada Materi Eksplorasi Profesi Ragam Bentang Alam Wilayah Bangkalan untuk Siswa Kelas IV SDN Pejagan 5 yang valid, praktis, dan efektif. Penelitian ini menggunakan model 4D (*Define, Design, Development, Dissemination*) yang dikembangkan oleh Thiagarajan, Dorothy S.Semmel dan Melvyn I. Semmel (1974). Menggunakan subjek 35 penelitian yaitu siswa kelas IV SDN Pejagan 5. Hasil penelitian menunjukkan bahwa produk *E-Book* Interaktif yang dikembangkan telah dinyatakan valid, efektif, dan praktis. Kevalidan produk dinilai oleh ahli materi (90%), ahli desain pembelajaran (91,6%), dan ahli bahan ajar (95%) memperoleh kategori sangat valid. Kepraktisan *E-Book* Interaktif pada uji coba terbatas mendapat presentase dari observasi aktivitas guru 83,33% (sangat praktis) dan observasi aktivitas siswa 93,99% (sangat praktis). Pada uji coba implementasi dari observasi aktivitas guru 96,65% (sangat praktis), observasi aktivitas siswa 96,55% (sangat praktis). Keefektifan *E-Book* Interaktif pada uji coba terbatas dinilai dari angket respon siswa dengan presentase 86% (sangat efektif), dan tes hasil belajar siswa 100% dengan kategori tuntas. Pada uji coba implementasi dinilai dari angket respon siswa dengan presentase 91,33% (sangat efektif), dan tes hasil belajar siswa 100% dengan kategori tuntas.

ABSTRACT

Abstract: This study aims to develop an Interactive E-Book on the Material of Exploring Professions in the Diverse Landscapes of the Bangkalan Region for Fourth Grade Students of SDN Pejagan 5 that is valid, practical, and effective. This study uses the 4D model (Define, Design, Development, Dissemination) developed by Thiagarajan, Dorothy S. Semmel and Melvyn I. Semmel (1974). Using 35 research subjects, namely fourth-grade students of SDN Pejagan 5. The results of the study indicate that the developed Interactive E-Book product has been declared valid, effective, and practical. The validity of the product was assessed by material experts (90%), learning design experts (91.6%), and teaching materials experts (95%) obtained a very valid category. The practicality of the Interactive E-Book in a limited trial received a percentage of teacher activity observations of 83.33% (very practical) and student activity observations of 93.99% (very practical). In the implementation trial, the teacher activity observations were 96.65% (very practical), and student activity observations were 96.55% (very practical). The effectiveness of the Interactive E-Book in a limited trial was assessed from the student response questionnaire with a percentage of 86% (very effective), and the student learning outcome test was 100% with a complete category. In the implementation trial, it was assessed from the student response questionnaire with a percentage of 91.33% (very effective), and the student learning outcome test was 100% with a complete category.

Keywords: *Professional exploration of various natural landscapes in the Bangkalan region, 4D Model, Development of Interactive E-Books*
